

Weston Hospicare (RCN 900328), provides physical, psychological, emotional and spiritual care to local people with life-limiting illnesses such as cancer, motor neurone disease and heart or lung failure. The Hospice's care reaches out to local people in Weston-super-Mare, North Somerset and border areas of Somerset providing a safe haven and source of comfort and guidance to every single person who needs it.

The Hospice consists of a day hospice, a ten bed In-patient Unit, a team of Hospice Community Nurse Specialists, Hospice at home, chaplaincy and bereavement services. These complementary services work in harmony to ensure patients receive excellent specialist care, be that at home or in the Hospice, and that they and their families are cared for and reassured throughout the toughest experience they will ever face.

Care is provided free of charge and costs nearly £3 million every year. Only 19% is funded by the NHS. The rest is raised through the generosity of the local community, fundraising events, partnerships with local companies, the hospice lottery and via the network of Hospice shops.
