

Bristol Airport Proposed Expansion WILL affect you. HAVE YOUR SAY.

Bristol Airport has plans to once again increase passenger numbers, this time to 15 million a year, adding 14,000 flights per annum. It will mean 1000's of extra night flights, more traffic and more pollution. Proposals for a longer runway will also mean larger and louder planes.

If you live in the vicinity of the airport, under the flight path, or on or near any road routes to and from the airport, these plans WILL affect you.

You can quickly and easily have your say by completing the BAAN (Bristol Airport Expansion Network) survey. BAAN are opposed to airport expansion but they would be grateful for your opinions, regardless if they are pro or anti expansion.

The survey takes only a short time to complete and is a quick and easy way to have your voice heard.
